

ANUPAM VERMA

Product Designer, UX, UI & Design Systems

8874377465 | verma15anupam@gmail.com | Bangalore ⇌ Delhi | [Portfolio](#) | [Behance](#) | [LinkedIn](#)

Product Designer with 4+ years of experience owning end-to-end UX: user flows, wireframes, interactive prototypes and the final UI. I build and maintain design systems for consistency at scale, run prototype testing to validate decisions, and hand off documented solutions to engineering. I sketch fast and treat design as a language the whole team can read.

EXPERIENCE

UI UX Designer — GyanDhan

Aug 2024 – Sep 2026

- Design System: audited the Figma library and live website, then restructured it into atomic design (atoms, molecules, organisms, templates) across 131 components, publishing it as an org-wide system usable without Figma.
- Redesigned a complex loan application journey into a self-serve experience by restructuring multi-step forms, surfacing self-serve options on the output page, clarifying CTAs, and designing document-upload and verification states, reducing application TAT by 50% and lowering dependency on counsellor support.
- Designed the user journey and user flow for applicants without offer letters using MECE structuring, adding an application-stage selector and a multi-college UI component; redesigned the output page to show interest rate, timeline and repayment options per college, lifting first-page conversion by 5%.
- Designed a responsive [Cost of Living Calculator](#) (desktop and mobile) covering 200+ cities across 100+ countries, translating the PRD into prompts and iterating the design end-to-end with AI tools (Figma Make).
- Designed and launched college selection resources — content-led discovery tools that lifted user engagement 40%.

UI UX Designer — Woggles

Jun 2023 – Jul 2024

- Led UI/UX design for a cross-functional team on an e-commerce web and mobile platform, working alongside product managers, developers and business stakeholders.
- Redesigned the Product Detail Page and checkout flow, resulting in a 20% increase in product-to-cart conversions.
- Planned and facilitated three in-depth usability testing sessions, identifying friction points and feeding findings straight back into the designs.
- Designed the Freecharge cashback integration flow, driving a 20% rise in prepaid transactions.
- Read heatmaps and product analytics to diagnose behavioural issues, contributing to a 40% reduction in bounce rate; visual design work raised average session duration from 45 seconds to 2.1 minutes.

Assistant Designer — Kids Chaupal

Jul 2021 – Jun 2023

- Designed the UI and user flow for the online Colorothon competition, enabling 20,000+ digital submissions during Covid.
- Created landing pages and campaign material across offline and online channels, driving a 35% increase in leads.
- Led social media creatives for a year, boosting engagement and page visibility.

Outside Work

Building [PlanGo](#), a host-and-earn app for finding companions for activities; the first version is live on the Play Store with 15,000+ users. Also into Bollywood, art and books, where most of my references come from.

SKILLS

Design

Design systems, information architecture, user flows, wireframing, interaction design, interactive prototyping, usability & prototype testing, user research, visual design, accessibility and inclusive design, branding

Software

Figma, Framer, Webflow, Origami Studio, Lottie, Adobe Suite (Photoshop, Illustrator, InDesign, After Effects), AI tools (ProtoPie, Lovable, vibecode, Figma Make, Rocket, Cursor, Claude)

Collaboration

Written & verbal communication, pencil sketching to present ideas fast, active listening, adaptability, decision-making, leadership, Agile delivery

EDUCATION

Bachelor of Design

National Institute of Fashion Technology, New Delhi
2015–2019

Master of Arts

Dr. Ram Manohar Lohia University
2020–2022

CERTIFICATION

Google UX Design Process

[Certificate 1](#)

[Certificate 2](#)
